INTRODUCTION - VISION

Business Technology Consulting, IT Solutions & IT Services

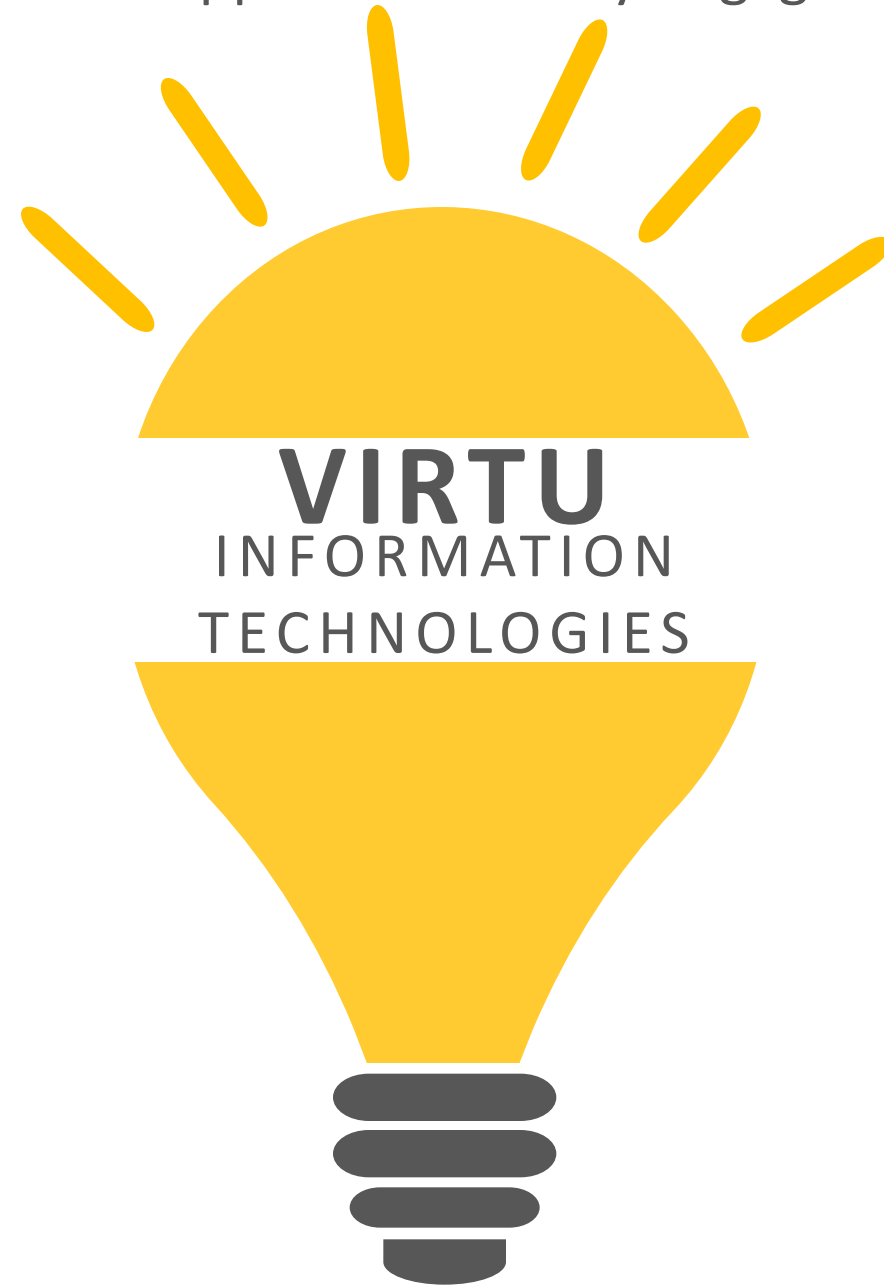

Virtu Information Technologies is a team of highly experienced, passionate and enthusiastic software professionals. We are here to build a community of dynamic, passionate and brilliant people to effectively use technology to build better user experience.

Our success formula is “Collaboration, Continuous feedback and Transparency.” — We firmly believe that a team of talented, motivated, and principled people could do wonders. To surpass expectations of our clients by achieving greater standards of excellence in providing global technology services.

Redefining Intelligence; Redesigning things around us; It's not just a world of things... it's the Intelligence of Things.

VirtuIT - Values

For VirtuIT, “The Next Level of your Business Success” is more than a slogan - it reflects our approach to every engagement.

Virtu IT delivers mobility transformation and technology services from ideation to execution, enabling Global 200 clients to outperform the competition. “Born digital,” Virtu takes an agile, collaborative approach to creating customized solutions across the digital value chain.

01

Virtu Information Technologies provides software, web, mobile application development and outsourcing services to MNCs and medium level companies.

02

VirtuIT believes in developing true partnerships. We foster a collegial environment where individual perspectives are respected and honest dialogue is expected.

03

VirtuIT is driven to meet client needs with determination and grit. We embrace tough challenges and do not rest until the problem is solved, the right way.

04

VirtuIT brings robust skills and forward looking perspectives to solve customer challenges. We use proven knowledge to make recommendations and provide expert guidance to our customers.

VirtuIT – Services Offering

Define, design and execute IT strategies that drive business growth

Mobile Application Development

Our expert teams develop stable and secure mobile apps for all types of mobile platforms, including: iPhone, iPad, Android, Windows and Blackberry Mobile Apps.

Custom Software Applications

Our *custom applications* development services are conceptualized, designed, and ... our *ASSESS-SMART software* quality-assessment services.

Website Design & Development

Our web Application services are tailored specifically to meet client requirements and business objectives of customers.

Digital and Internet Marketing

Online marketing is essential for the success of your online business Yet many people get a website up and running then forego their web marketing.

VirtuIT – Infrastructure

Optimize performance and availability, quickly remediate

❑ Office Infrastructure

- Large Office space
- Multiple environments – production and test environment

❑ Security

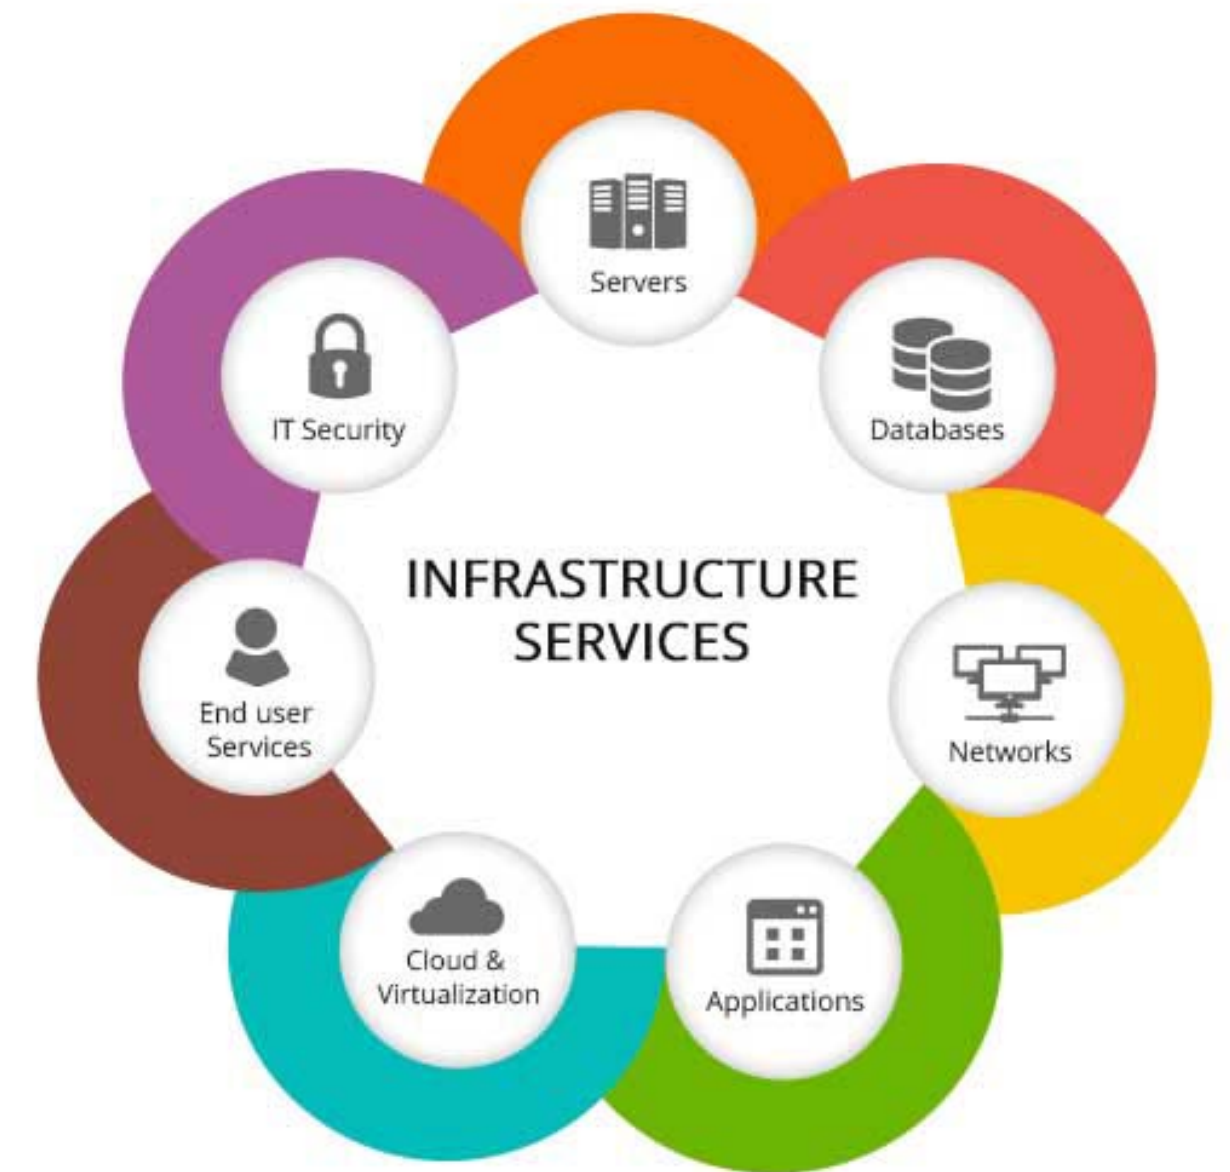

- Secure access card systems in development and server room areas
- Application and data access restricted to maintain confidentiality of information
- Removable media access restricted

❑ Connectivity

- Dedicated high bandwidth internet connection
- Dedicated mail server
- Helpdesk application hosted on T1 links
- Polycom based tele / video conferencing facility using ISDN lines

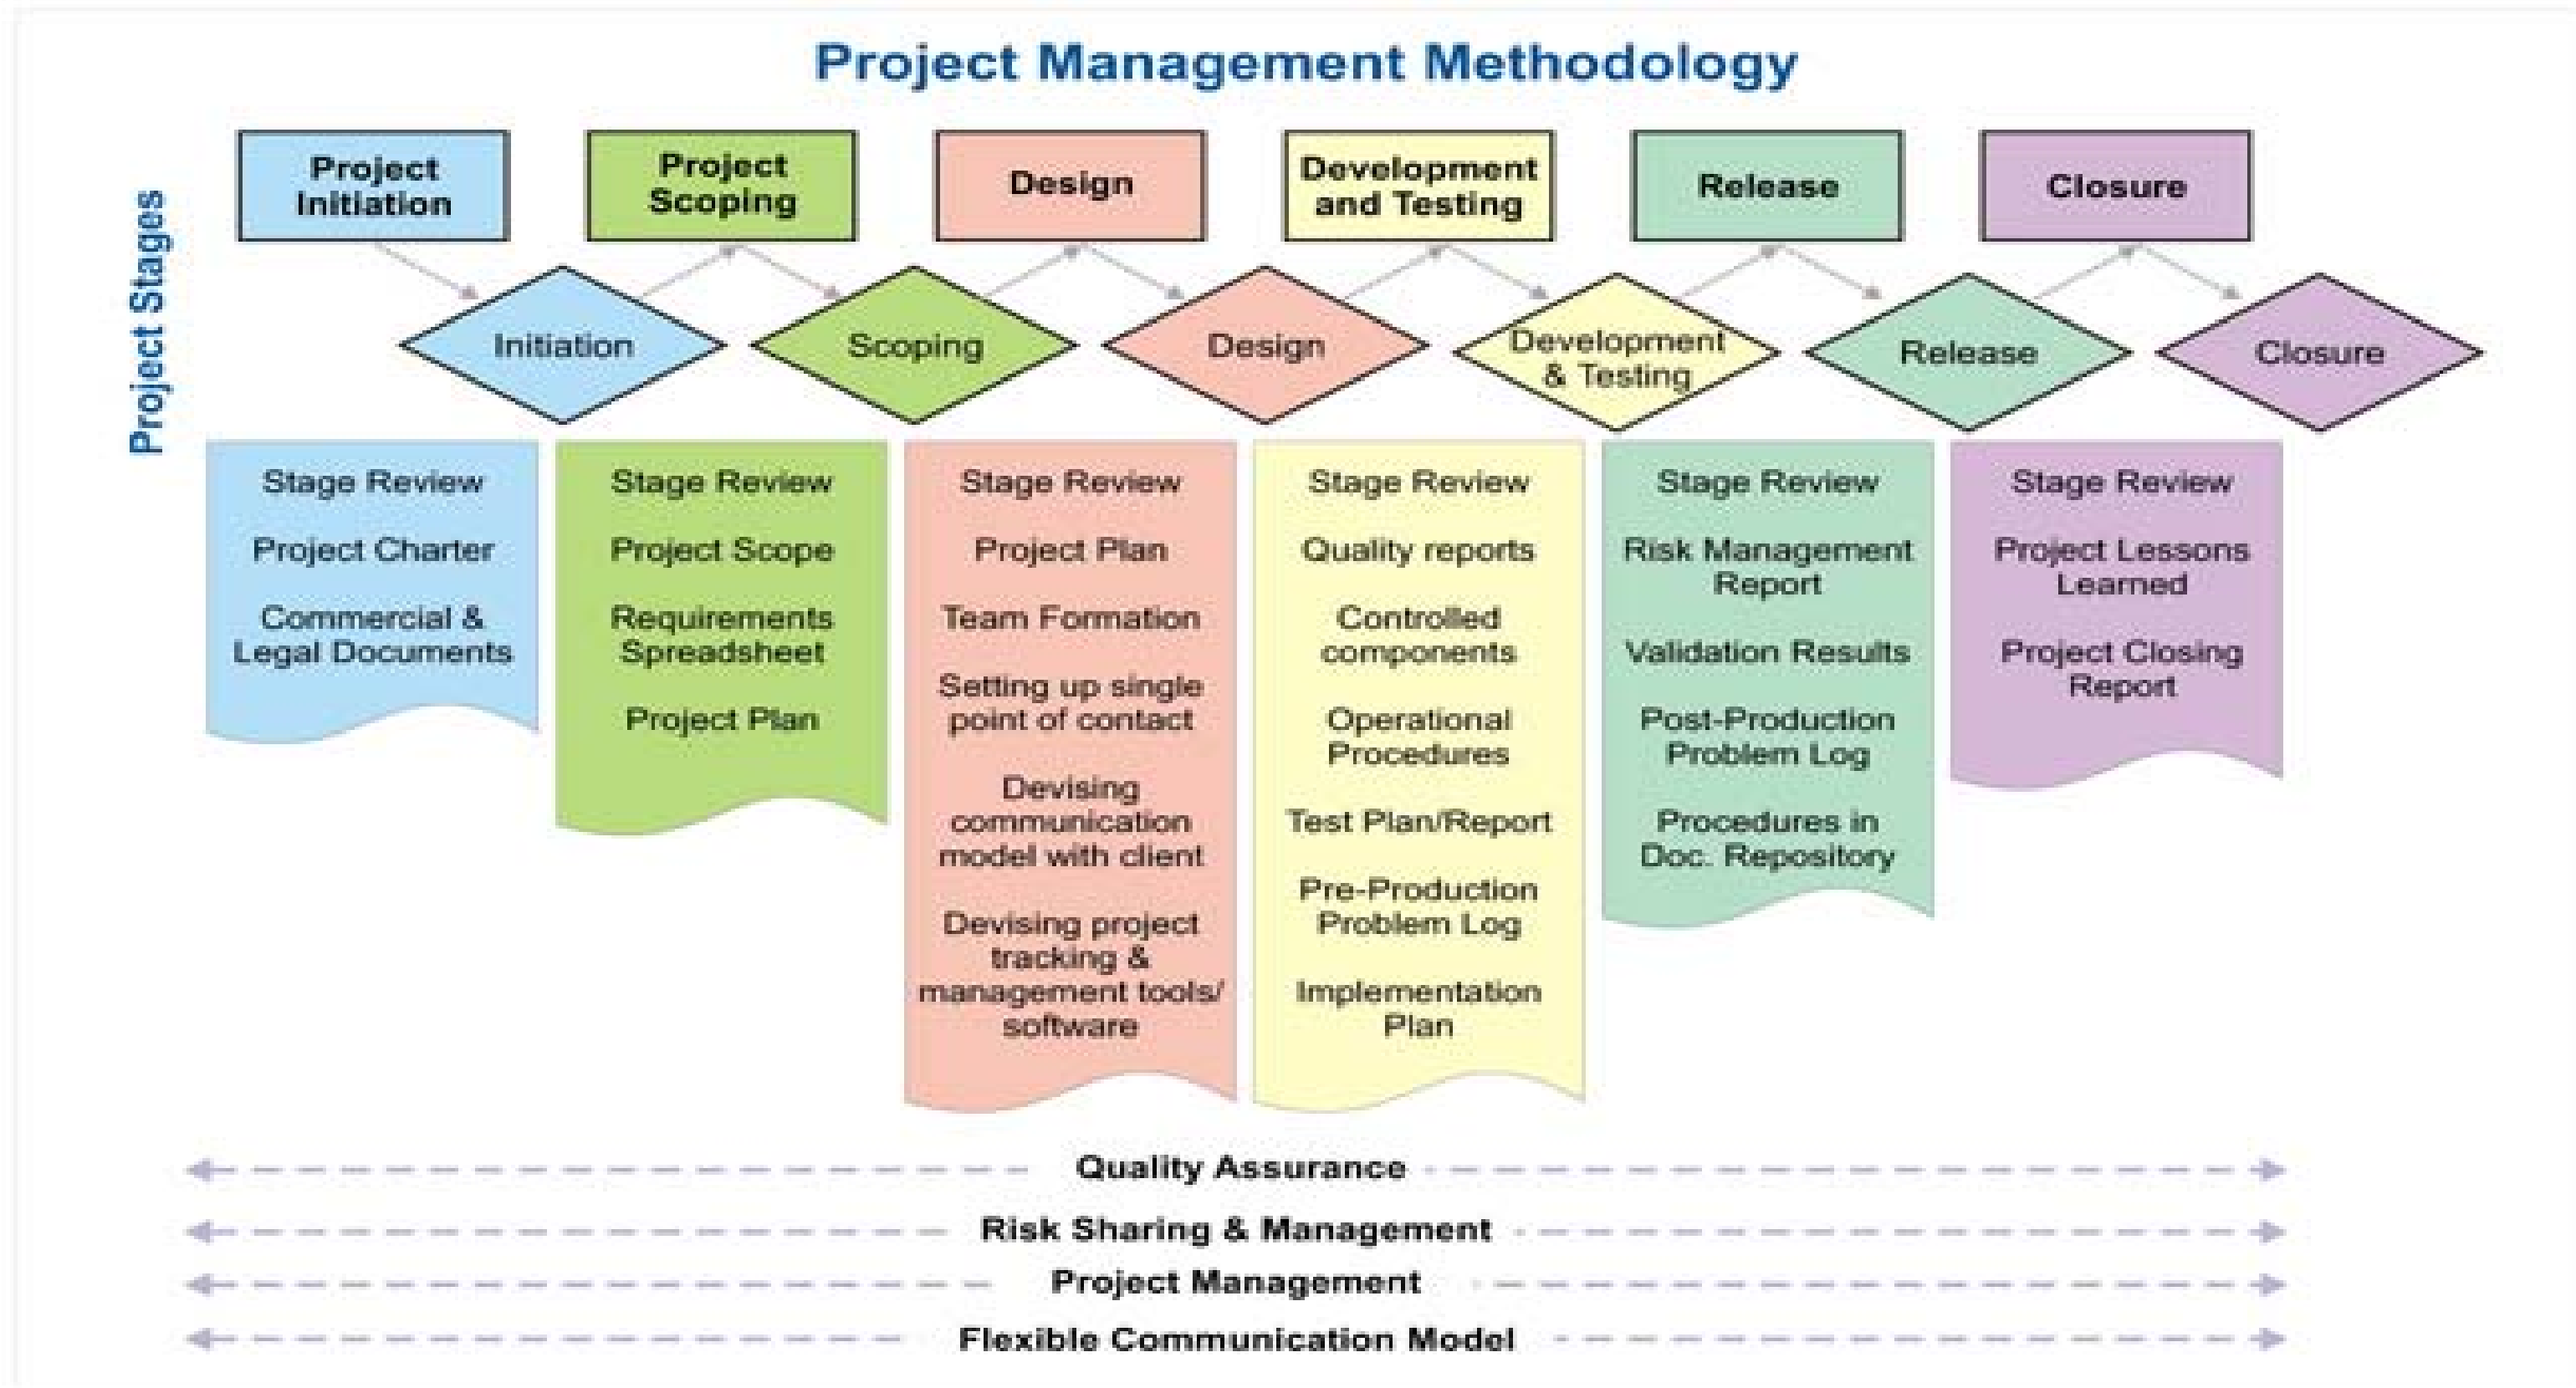

❑ Disaster Recovery

- Hot backup facility with offsite backups to ensure there is no loss of data and time due to infrastructure failures.
- Provision to rapidly create a alternate development facility at another site.
